

Dr. Robert W. Christensen

July 16, 2013

Dear Fellow American,

Many of you know of the call on my life to bring forth the first implants for reconstructing the dysfunctional, degenerated or missing temporomandibular joint and many of you know that in 1983 I was given the vision for starting a medical device company which we called, TMJ Implants, Inc. My wife and I founded that company in Golden, Colorado in January 1989. Over the next 21 years we brought forth two medical device companies relating to the innovations which I had brought forth in 1960. I was granted U.S. Patents for the TMJ implants in the 1960s.

Some of you are aware of the tremendous battles and outright attacks that came forth as I attempted to gain regulatory approval for these devices from the FDA. Those attacks were not unlike what we have recently seen with the Christian and conservative Tea Party groups who were attempting to gain IRS approval for their ministries as 501-C4 tax exempt entities, but were thwarted or persecuted by our own government.

The safety and effectiveness of the partial TMJ implant and the total TMJ implants which I innovated have been remarkable over these past 53 years. But as some of you are aware, the FDA made our final approval a most difficult and expensive affair. Oh, we gained the approvals we needed in 2001 after a 24 month battle, but the costs were staggering. Many of you will wonder, Why?

Like the recent IRS scandals, I truly believe we were targeted by the FDA for a couple of reasons. The first was because the lead FDA investigator, Dr. Susan Runner, had conflicts of interest and she also had a desire to gain millions of dollars worth of government grants which she wished to use to study the very disease process for which I had found a "cure". As a well-known Denver attorney, Walter Gerash, once said to me, "Bob, Follow the money." I believe Walter was correct. Though we gained the approvals which were needed, the FDA had another trick up their sleeve. You can read about that in my book, **FDA You Were WRONG!** which can be found on Amazon or my website www.drrobcrusade.com

I have never been a quitter and I am passionate about bringing our beloved America to the forefront, thus, with the help of two dear friends, Peter Daniels of Australia and Monroe Bush the animator from Indianapolis, an animated video has been produced to briefly tell the story depicted more fully in my book. It is my wish, that each of you could send the attached link to at least 10 of your friends and acquaintances, and even to your Press, so that this story might literally go across America. Here is the present link <http://youtu.be/JxwV6oR9Nys> and which will be changed tomorrow and I will get it to each of you. Thank you for your help.

God bless,

Bob
